Summary

A studious Web Developer with a background in manufacturing professional audio equipment. Has successfully managed a small team and understands the importance of time management and efficiency. Excited to be a part of a team that I can learn from and grow with.

Projects

Book Worm | <https://github.com/shelbypalumbo/BookWorm> | <https://bookwormlibrary.herokuapp.com/>

An online library search and publishing application. Users have the ability to sign up, sign in, search books, save books to their dashboard, as well as publish their own writing.

My contributions to this project included front-end design, layout, and back-end database query support.

Implements the use of JavaScript, jQuery, MySQL, Express.js, HTML, CSS, Epub-gen, Heroku and Google Books APIs.

Employee Tracker | <https://github.com/shelbypalumbo/Employee-Tracker>

A CLI Employee Management System that allows a user to make changes to database tables from the command line.

This application was built independently.

Implements the use of JavaScript, MySQL, Node.js, and Inquirer.

Developer Profile Generator | <https://github.com/shelbypalumbo/Developer-Profile-Generator> | <https://shelbypalumbo.github.io/Developer-Profile-Generator/>

This application dynamically generates a PDF file and HTML profile page for a developer based on the GitHub username provided through the command line prompts.

This application was built independently.

I used JavaScript, HTML, CSS, Node.js, Puppeteer, Inquirer, and a Bootstrap framework.
